

Flash Introduction

2 Days (9am to 4pm)

Course Description

Basic web pages are created in HTML, but it's easy to hit the limitations of that language. Many websites these days use Flash to handle interactive menus, animations, sounds, and many other things. This course will show you how to raise the bar on any website and produce the effects that are becoming the standard for professional companies.

Course Prerequisite: Knowledge of basic Windows use and ability to use keyboard and mouse.

Topics Covered

Exploring Flash CS4/CS5

Define Rich Internet Applications
Orientation to Adobe Flash CS4/CS5
The Flash Screen
The Process of Producing Flash Applications

Working with Graphics

Import Images
Create Vector Graphics
Modify Vector Graphics
Stroke versus Fill
